EXPERIENCE

October
2023
|
August
2022

Senior R Developer / Data Scientist

Civey

📍 Berlin, DE

- Developed software to perform statistical analysis of survey data from millions of users using R, Python, SQL and Bash.
- Coordinated the performance monitoring of our software products, including reporting and addressing troubleshooting requests from other teams.
- Analyzed data from millions of users using R, PostgreSQL and Clickhouse and produced visualizations, dashboards and reports to answer stakeholder's analytical requests.
- Developed internal tools with R, Bash, PostgreSQL, Clickhouse and Python used to support other teams, resulting in an increased speed and flexibility to meet customer's requests.
- Created and extended company-wide documentation on my team's statistical and software products.
- Trained new team members by using documentation, learning sessions, joint code reviews and pair-programming.

2020

R Developer / Data Scientist

Civey

📍 Berlin, DE

- Contributed to the development of statistical libraries for survey data analysis using R, SQL and Bash.
- Contributed to the development of a bash command line tool used to configure the development environment in production.
- Lead the development of a new feature for geographical survey analysis, resulting in a new product.
- Developed a service that daily updates statistical estimates of the German population using R and Python Airflow, which directly improved the quality of our poll results.

2020
|
2016

Research Fellow

Department of Psychological Methods - Humboldt-University

📍 Berlin, DE

- Worked with large data (millions of observations), using R to program and perform automated quality checking and data manipulation routines.
- Use of high performance computing clusters and threading in order to provide scalable modeling solutions.
- Applied hierarchical Bayesian regression and mixture modeling techniques, using the Stan probabilistic programming language, to account for different aspects of how the data was structured and generated.
- Developed visualizations using ggplot in R to efficiently communicate insights and assess statistical model performance.

SKILLS

Troubleshooting and Problem-solving

Adaptability and Quick Learning

Effective communication of complex analytical concepts, including public speaking

Statistical analysis and reporting

TOOLS

Operating Systems

MacOS

Linux (Ubuntu, Debian, FreeBSD)

Windows 10/11

Programming Languages

R, Python, SQL, Bash

Software tools

Issue Tracking with Jira

Dynamic Reporting with Quarto

Version Control with git

Languages

English (Fluent)

Portuguese (Native)

German (A2, B1 exam scheduled for 28/05/2025)

2016
|
2015

Research Trainee

Psychological methods group

📍 University of Amsterdam, NL

- Created, maintained an archival data base with historical events from the Psychometric Society, resulting in a publication.
- Developed R based animated network visualizations of sequences of historical events.

CERTIFICATIONS

Issued
on
04/12/2024

CompTIA A+

comptia.org/certifications/a

📍 Remote

- Learning essential IT skills required for supporting and troubleshooting:
 - Hardware;
 - Software;
 - Mobile devices;
 - Networking;
 - Operating Systems (Windows, Apple and Linux);
 - Virtualization and Cloud Computing;
 - Security.

EDUCATION

2022
|
2016

PhD in Computational Psychology

Humboldt-University

📍 Berlin

- Grant by the International Max Planck Research School on the Life Course.
- Incomplete - did not graduate.

2015
|
2012

Masters in Clinical Psychology

University of Lisbon

📍 Lisbon, Portugal

2011
|
2009

BA in Psychological Sciences

University of Lisbon

📍 Lisbon, Portugal
